**Applicant Initiated Interview Request Form – Continuation Sheet 1 of 2**

**PROPOSED DRAFT AMENDMENTS - DO NOT ENTER**

Claim 1 (proposed amendments). An apparatus comprising:

first and second connectors, each of said connectors being adapted for connection to a computer;

a communications router operatively situated between the first and second connectors;

a nonvolatile memory operatively situated between the connectors, said memory storing a driver for the communications router and a software load to be installed on a computer to which either the first connector or the second connector is connected, wherein said driver and software load are installed on a computer in response to connecting the first or second connector to the computer.

Claim 8 (proposed amendments). A method of performing a computer setup comprising:

operatively connecting [[a]] an integrated hardware device between two computers, said device comprising a communications router and a nonvolatile memory between two computers;

initiating an autorun function by at least one of the computers in response to connecting said device thereto;

loading a driver for the communications router to at least one of the computers in response to the autorun function, said driver residing in the nonvolatile memory;

installing setup software to at least one of the computers via the communications router, said setup software also residing in the nonvolatile memory.

Application No.: 10/659,756 First Named Applicant: Edward Nathan Koppelman Cornillon  
Examiner: Anish Sikri Art Unit: 2143 Status of Application: Pending  
Attorney Docket No.: MS#302666.01 (5063)

**Applicant Initiated Interview Request Form – Continuation Sheet 2 of 2**

Claim 20 (proposed amendments). One or more computer-readable media comprising:

a driver for a communications router;

a user interface for guiding a user to transfer files from one computer to another computer via the communications router; and

a setup program for automatically installing the user interface, wherein the computer readable media and the communications router are operatively connected between a first connector and a second connector, each of said connectors being adapted for connection to a computer and wherein the setup program automatically installs the user interface on the computer in response to connecting the first or second connector to the computer.
